PRICES PAID OHIO TIMBER PRODUCERS - MARCH-MAY 1974

In this report, quotations represent prices paid Ohio timber producers during the period March-May 1974. The comparison of prices based on Doyle and International log rule was requested by industry. Data reported on International log rule are comparable to previous reports. These semi-annual reports should be used only as a guide for determining the price and value of timber and logs to be marketed.

Current market supply and demand are key factors in the price levels. Other important considerations affecting price are: accessibility; roads; right-of-way; site and terrain; distance to market; tree size and quality. These factors explain the wide range in some of the prices reported by specific grade, size and species.
