PRICES PAID OHIO TIMBER PRODUCERS - MARCH-MAY 1975

These quotations reflect prices paid to Ohio timber producers during March, April and May. Prices are reported for both the Doyle and International log rules to be comparable with previous reports. This report provides a general guide of timber and log prices.

Local prices will be affected by other important factors such as: accessibility, right of ways, terrain, distance to haul, tree size, quality and quantity. These quotations are survey data on prices only. Survey does not indicate volume of logs sold nor are prices weighted.

STUMPAGE PRICES: The prices for March through May compared with the prices of 6 months ago show a mixed trend. In the western area some species show a slight increase in prices and others show a decrease. The prices in the northeast show an increase, while those in the southeast show a decrease. Walnut price quotations are less than six months ago but oak prices are stronger.

DELIVERED SAWLOGS: In comparison to 6 months and a year ago, the reported average of sawlog prices decreased for all species by grades. Reporter comments imply a decrease in demand for lower grades of logs.

PRICES PAID OHIO TIMBER PRODUCERS - SEPTEMBER-NOVEMBER 1974

These quotations reflect prices paid to Ohio timber producers during September, October and November. Prices are reported for both the Doyle and International log rules to be comparable with previous reports. This report provides a general guide of the price of timber and logs to be marketed.

Local prices will be affected by other important factors such as: accessibility, right of ways, terrain, distance to haul, tree size, quality and quantity. These quotations are survey data on prices only. They do not reflect mills that have reduced volume or shut down for the season. Survey does not indicate volume of logs sold nor are prices weighted.

STUMPAGE PRICES: Comparison of prices for September through November with prices of 6 months and a year ago show that some species prices in the western area increased slightly and prices for other species decreased. Prices in the northeast and southeast decreased. Reporter comments indicate a softening in demand for sawlogs.

DELIVERED SAWLOGS: Reported average of all grades compared to 6 months and a year ago shows that soft woods have dropped more than the harder woods. However, comparison within grade shows lower prices for all species. This indicates that the lower grades of logs are not being purchased.
