PRICES PAID OHIO TIMBER PRODUCERS - MARCH-MAY 1978

These quotations reflect prices paid to Ohio timber producers during March, April and May. Prices are reported for both the Doyle and International log rules to be comparable with previous reports. This report provides a general guide of timber and log prices.

Local prices will be affected by other important factors such as: accessibility, right of ways, terrain, distance to haul, tree size, quality and quantity. These quotations are survey data on prices only. The survey does not indicate volume of logs sold nor are the prices weighted.

STUMPAGE PRICES: During the March-May pricing period, average stumpage prices advanced for nearly all species from the previous pricing period. In addition, most face and veneer stumpage prices were above both last year and six months earlier. Prices for stumpage used in the production of handles, pallets, blocking, and cooperage were slightly higher in most instances.

DELIVERED SAWLOGS: Prices paid for sawlogs delivered to mills during March-May were higher than both the previous period (September-November 1977) and a year earlier.

Price paid per ton to Ohio producers for unpeeled pulpwood, charcoal and ferro-alloy timber delivered to buyers during March-May 1978 ranged from \$8.00 to \$12.00 per ton and averaged \$9.84.

An initial effort was made to collect stumpage prices on timber being used exclusively for posts. However, our survey enumeration did not pick up a single observation.

The Service Forestry Section, Division of Forestry, Ohio Department of Natural Resources; the Division of Markets, Ohio Department of Agriculture and the Economics, Statistics and Cooperatives Service, U. S. Department of Agriculture are grateful for the cooperation of the buyers, mills and others who made possible this report on Ohio timber products.

The next report will be issued for the period September-November 1978.

PRICES PAID OHIO TIMBER PRODUCERS - SEPTEMBER-NOVEMBER 1977

These quotations reflect prices paid to Ohio timber producers during September, October and November. Prices are reported for both the Doyle and International log rules to be comparable with previous reports. This report provides a general guide of timber and log prices.

Local prices will be affected by other important factors such as: accessibility, right of ways, terrain, distance to haul, tree size, quality and quantity. These quotations are survey data on prices only. The survey does not indicate volume of logs sold nor are the prices weighted.

STUMPAGE PRICES: During the September-November pricing period, stumpage prices held steady to stronger for nearly all species compared with the previous pricing period (March-May 1977). Face and veneer stumpage prices for walnut were lower than the previous period but higher than a year earlier; oak prices advanced from both March-May 1977 and September-November 1976.

DELIVERED SAWLOGS: The average price paid for sawlogs delivered to mills during September-November was generally higher than March-May 1977 and a year earlier.
