# LAKE WHITE

## Pike County

### LOCATION

Lake White is located four miles southwest of Waverly in Pike County. Access to Lake White is provided from State Route 104 and State Route 220.

### HISTORY AND DESCRIPTION

Lake White was impounded in 1935 by the damming of Pee Pee Creek. State Route 104 serves as the dam. The dam was constructed by the then State Department of Highways under the Highway and Dam Act. The area surrounding Lake White consists of forested, rugged hills. Lake White is part of the Lake White State Park. Most of the land surrounding Lake White is privately owned.

### FISH OF INTEREST TO ANGLERS

Lake White has populations of largemouth bass and spotted bass with spotted bass being the most abundant of the two species. Saugeye fingerlings are stocked annually, channel catfish yearlings are stocked every other year. Sunfish are numerous with bluegill the most dominant sunfish species. Crappie are also present offering an additional opportunity for anglers.

### METHODS OF FISHING AND BEST FISHING SITES

Largemouth bass can be caught casting the shoreline, paying particular attention to visible structure. Artificial lures such as rubber worms, spinnerbaits, and crankbaits work well. The rip-rap face of the dam and boat docks are also good areas to try. Sunfish can be caught throughout the lake using live bait such as waxworms or redworms. Crappie are taken usually with minnows and a bobber. Look for stumps or brushpiles, that act as attractors for crappie and other sportfish. Channel catfish can be caught fishing on the bottom with chicken liver or nightcrawlers. Night fishing for catfish is a popular method for catfish anglers. Twister tail jigs tipped with a minnow or piece of nightcrawler are effective for saugeye.

### RECREATIONAL FACILITIES

Boat launching facilities are located near the State Route 551 and State Route 104 intersection. There are no horsepower restrictions for boats. The ODNR Division of Parks and Recreation operates and maintains parking lots, boat ramps and docks, swimming beaches, and picnic areas.

### FISH OHIO

Anglers who catch a big fish should enter their prize fish in the Fish Ohio angler recognition program.

A fish qualifies for an award if it meets the minimum size requirement set for the Fish Ohio program.

Applications are available from the ODNR Division of Wildlife and from many tackle and bait stores. An application is also available in the Fishing Regulations Digest.

### FISH MANAGEMENT ACTIVITIES

The Division of Wildlife's fish management activities include stocking, population monitoring with nets, electrofishing surveys, creel census, felling trees, and preparing Christmas tree piles to act as fish attractors, and conducting general physical and chemical water quality analyses. A continuing check of water quality and fish populations is vital in determining the management practices necessary to produce quality fish for the public.

### ADDITIONAL INFORMATION

Questions and inquiries can be directed to Wildlife District Four, 360 East State Street, Athens, Ohio 45701 telephone 740-589-9930. The Division of Wildlife also has a website for information on fishing regulations, tips, maps, and other wildlife related material ([www.wildohio.com](http://www.wildohio.com)). To get other maps or publications call toll free 1-800-WILDLIFE.

### TURN IN A POACHER

Ohio's TIP, "Turn In a Poacher," program is helping curtail poaching throughout the state. TIP is designed to involve the public in reporting wildlife violations. Citizens who observe wildlife violations should call the TIP toll-free hotline, 1-800-POACHER.
